PROJECS

ProjeCS is more than a consultancy firm. At ProjeCS we create customized services based on industry best practices, guaranteeing optimal business results.

Our global team of handpicked experts and consultants is trained to deliver quality and generate growth.

We provide expertise in a wide range of fields including, but not limited to, Construction, Industry, Infrastructure, and Gas & Oil. Our case specific solutions, supplemented by the latest technology and procedures, enable our clients within the private, public, and military sectors to advance in their specific fields.

Our dedication and hard work as industry and government partners has earned us global recognition for managing large and complex commissions. Subsequently this established ProjeCS' reputation as a market leader ahead of the times.

- ▶ 3.2 Cost Management
- ▶ 3.3 Digital Solutions

SERVICES

ProjeCS offers a customized set of services that vary according to each client's needs.

We have navigated cases from beginning to end, overseeing the pre-design, design, and execution phases.

We have also intervened in the middle or late stages of a case's development and execution. Through our adaptability and expertise, we have helped our clients tackle a variety of challenges. ProjeCS scope of work includes, and expands beyond, project management, cost management and digital solutions.

Scheduling

Our expertise in time management and various scheduling forms ensures that the cases we are involved with run smoothly. We offer a range of scheduling options including CPM, Pre-Bid, Periodic, Look Aheads, Resource & Cost Loaded scheduling, and Earned Value Management.

Delay / Claims Analysis

Project delays are common across all industries. Therefore, it is important to allocate responsibility and determine the cost of the delay. Through delay analysis, we can correctly assess the obstacles keeping a project from finishing on time, and recommend the best suited solutions. We can also calculate the additional expenses resulting from the delay and adjust the budget accordingly.

Project & Portfolio Management

ProjeCS has years of experience in dealing with a wide assortment of projects, across multiple countries and various fields. This allows us to tackle any challenge with versatility.

Facilities Management

ProjeCS can handle several aspects of managing small and large facilities. These include and expand beyond, plumbing, sanitation, security, technical services, and general maintenance.

Staff Augmentation

Our experience in the field allows us to recognize the high calibre talents and allocate them effectively. We can boost teams through staff augmentation while training pre-existing team members on industry best practices.

Contract & Subcontract Facilitation

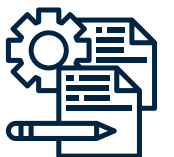

Our experience in the field allows us to recognize the high calibre talents and allocate them effectively. We can boost teams through staff augmentation while training pre-existing team members on industry best practices.

Design & Construction Process Management

ProjeCS can act as a partner from the beginning to the end of a project, or become involved during the middle stages. Regardless of our starting point, we ensure seamless transition between each stage of the design and construction process.

Project Coordination

We excel at coordinating between different entities, contractors, and construction teams simultaneously. Open communication and information transparency are hallmarks of ProjeCS involvement.

COST MANAGEMENT SERVICES

Our diversified industry knowledge helps clients mitigate risks.

ProjeCS clients benefit from a wealth of financial information and resources which help navigate the pitfalls that come with large scale projects. Our verified cost management services lead to reliable financial plans which are instrumental to laying down project road maps, achieving short and long term benefits.

Budgeting

Earned Value Management

Risk Mitigation

Estimation & Quantity Takeoffs

Financial Forecasting

Budgeting

Large scale can easily surpass their initial budgets without precise monitoring. We provide detailed budgeting services based on updated market information and ensure that project spending stays within its intended parameters.

Earned Value Management

Through Earned Value Management, ProjeCS assesses the performance of a project based on its total costs, schedule, and scope. These calculations help project managers predict the financial direction of a project and act accordingly.

Risk Mitigation

ProjeCS employs a number of risk mitigation strategies to decrease projects' and organizations' exposure to potential risks. Our experience in various fields enhances our understanding of possible risks and provides us with the insights needed to reduce them.

Estimation & Quantity Takeoffs

Through the benefit of field experience, ProjeCS is able to accurately estimate the costs, time, and resources needed for a project. As the market is constantly evolving, we are also capable of adapting our estimates to accommodate unexpected changes.

Financial Forecasting

ProjeCS' team of experts can provide reliable predictions of a business' or projects' performance based on data-centric models, techniques, and methodologies.

DIGITAL SOLUTIONS SERVICES

At ProjeCS, we value innovation and staying updated on changes across multiple industries. We integrate this evolving knowledge into each aspect of our work.

ProjeCS' digital solutions have been instrumental to overcoming clients' traditional and modern challenges.

Our additional technical services ensure smoother daily operations of small and large scale facilities alike. The core of our methodology is catering the best suited solutions towards the needs of each specific case.

Digital Solutions

Building Information Modeling (BIM)

Software Implementation

E-Procurement & E-Bidding

Electronic Document Control

Laser Scanning

Virtual Tours

Building Information Modeling (BIM)

ProjeCS has a specialized Building Information Modeling (BIM) division that excels at revolutionizing the traditional design and construction process. Our BIM offerings include 3D, 4D, 5D, and 6D modeling, all which can be integrated separately or cohesively. These services lead to more efficient planning, designing, construction, and project infrastructure management.

Software Implementation

Software issues can derail productivity. This is why ProjeCS implements reliable, efficient, and updated softwares catered to a facility's specific needs. We also provide troubleshooting and technical support services to maintain the smooth systems operations.

E-Procurement and E-Bidding

Through these services, ProjeCS adapts the traditional procurement and bidding process to the digital world. Converting to electric systems grants access to a wider reach of suppliers and materials. This also improves the documentation process, allowing for more reliable tracking and record keeping.

Electronic Document Control

ProjeCS stores and manages documents through an organized and sophisticated electronic document control system. This integrated system significantly improves archiving and document retrieval, while inhabiting less space than traditional methods.

Laser Scanning

Our laser scanning services provide time and cost saving solutions, allowing for better planning and pre-fabrication of materials, particularly steel.

Virtual Tours

Experience projects and facilities long before their completion with ProjeCS' virtual tours. These services allow for clearer visualization of a project's final stages and present opportunities to make amendments earlier in the process.
